

At Montanuniversität Leoben, Austria, at the Chair of Applied Geophysics within a tenure-track position has become available for full-time, permanent employment with a start at the earliest possible date.

The candidate is expected to apply geophysical and geostatistical methods to characterize subsurface reservoirs. The successful candidate must hold a PhD (with distinction) in geophysics or a related discipline. A record of international journal publications, experience of university-level teaching and strong didactic skills are required. An excellent command of English, spoken and written, is a prerequisite and the willingness to learn German is essential.

Please submit your application documents until 15 July 2020 via the online form on the university homepage www.unileoben.ac.at/jobs (reference number *2005WPA*).

Rector:

Univ.-Prof. Dipl.-Ing. Dr.techn. Dr.h.c. Wilfried Eichlseder
